¿Qué es Sentiment Analysis (SA)?

Sentiment Analysis (SA) es una rama del NLP que tiene como objetivo analizar opiniones de la gente referente a un producto, evento, compañía, experiencia, etc.

"Alhambra with General Life parks and gardens, the tower and Nazrid palaces is absolutely amazing. If you are in Granada you must not miss it."

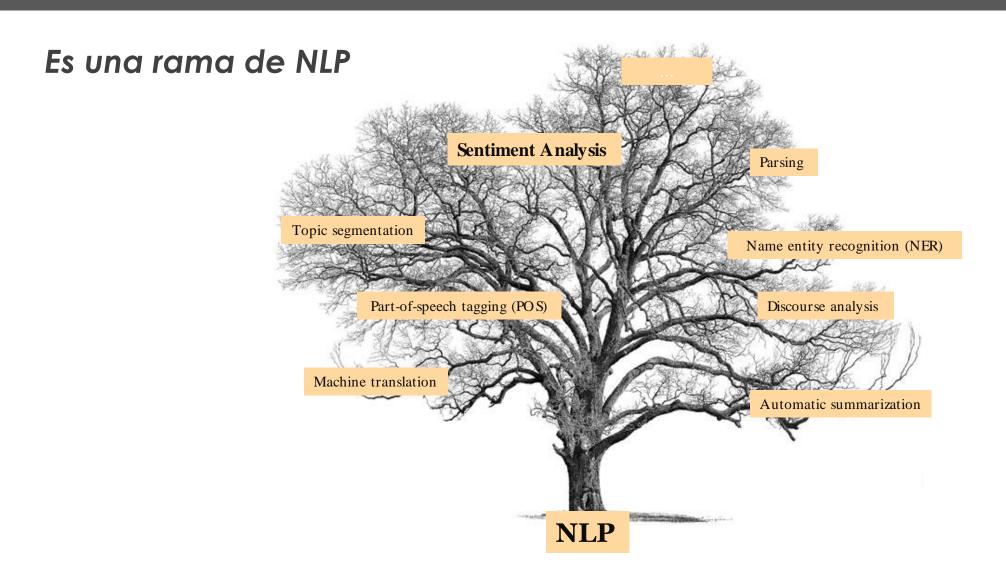

"DO NOT EVEN TRY TO VISIT - A total waste of time!!!. Spent 5 hours in the ticket queue in the broiling sun 35 degrees. An officious staff member told us when we reached the head of the queue that there were no more tickets and to buy online..."

"Most visited monument in Spain. There are no words to descibe this place - beaty awaits around every corner. The mixture of two cultures in one place makes it very special..."
